

Tender Sure Roads

Tender Sure model has been adopted to upgrade the selected main roads in Bangalore to international standards.

Salient features of Tender SURE roads:

- Uniform Standard Carriage Way width from one junction to another.
- Properly designed footpaths providing ample space for pedestrian.
- Bicycle lane wherever required.
- Bus Bay to accommodate easy egress and ingress of passengers of public transport buses.
- Well designed Bus Stops
- Parking Bay for parking of vehicles.
- Road intersection development.
- Dedicated corridors below footpaths to lay conduits of essential amenities such as electricity, water, sewage, OFC etc. This will eliminate the need to excavate the roads for repairs.
- Bituminous or Rigid pavement carriageway built with proper camber and profile as per Indian Road Congress (IRC) guidelines, so that vehicular movement is streamlined.
- To minimize power consumption and increase longevity of usage LED street lamps are used.
- Incorporating Road sign, Road marking and also Zebra crossing in junctions for pedestrian crossing.
- Proper storm water drainage system on both sides of the road to eliminate flowing or ponding of rain water on road.
- Proper landscaping to increase the aesthetics of the roads and city.

Tender SURE roads presently under implementation

Sl. No.	Name of the Road	Approx. length in Kms.	Project Cost (Rs. In Crore)	Status
